

RISE Release 1.1.0

January 31, 2020

Release Description

RISE Release 1.1.0 is a minor release. It addresses six issues, including four high priority issues and two low priority issues. High priority issues include two changes to the RISE database parameter table, the addition of a filter for DOI unified regions on the map interface, and fixing the destination URL for the “Back to RISE” widget on the map .

Issues Addressed in this Release

Issue #	Issue Title
#133	Display the full region names in the attribute table (while still storing location codes in the RISE database)
#152	Add Parameter Group Field to Database
#153	Add filter for DOI Unified Regions to map
#157	Change parameterCode from varchar to JSON
#177	Make text in information widget left justified
#178	Fix destination URL for Back to RISE widget
